VideoFX™

Video Capture Suite

Transform Your Macintosh® into a Virtual Video-Editing Studio

Easily connect any video source, such as a camcorder, VCR or DVD, to your Mac to capture, edit and print video and photos!

• VideoFX connection hub

Includes Everything You Need
• VideoFX connection hub
• VideoFX EZ Install Guide
• USB cable
• S-video cable
• Composite RCA video cable
• RCA-to-mini-stereo audio cable
• CD-ROM with:
  - VideoImpression™—video capture and editing software
  - PhotoStudio™—image editing software
  - PhotoPrinter™—image layout and printing software
 - PhotoMontage™—image manipulation software

CAPTURE	**EDIT**	**CREATE**
Grab still images or video directly from your video tapes or camcorder.	Cut scenes, add in video footage or still images, modify to your liking, then save on your computer.	Manipulate and edit still images by taking out red-eye or scratches to produce your own works of art.
CATALOG	**PRINT**	**SHARE**
Organize all your personal video clips or still images into albums to be enjoyed for years to come.	Choose from the FREE image-templates or create your own, add text or effects, then easily print.	Save your videos and images into formats ready to e-mail to others or publish on the Web.

Do you own a new Power Macintosh® G3, G4, iMac™, iBook™ or do you have a USB port on your Macintosh? The manufacturer of cool Macintosh products for over 10 years has a new device specially designed and optimized to take advantage of all the benefits offered with USB technology—ease of setup and simple configuration as well as faster performance to mention just a few! Installation of the VideoFX connection hub is a snap! It installs into the USB port of your computer in seconds, then simply install the included software and you're ready to easily connect to any video source, such as a camcorder, VCR or DVD.

For Any Macintosh with a USB Port

GLOBAL VILLAGE

VideoFX™

Video Capture Suite

# Capture, Edit, Create, Catalog, Print or Share Still Photos or Video.

VideoImpression™
Arrange videos and still images into personalized video clips by dragging and dropping into a storyboard. You can add titles and text or enhance the color of your images. Then create self-playing files to share over e-mail.

PhotoStudio™
Instantly edit or retouch your images using a variety of tools, such as brightness, contrast, hue and saturation. Also included is a wide selection of special effect tools, including clone, smudge, emboss, ripple and more.

PhotoPrinter™
Choose from a wide selection of layout templates or create your own to meet any printing need. Add text in any size, style or color to any image. You can also add frames, borders or edges to any image.

PhotoMontage™
Create a "montage" of your images from thousands of micro-images. Use the included Mega Collection images (over 20,000) or add your own images to a micro-image database.
