BocaVision

BocaVision DTC203 Windows-based Terminal.

A true, full-featured Windows-based terminal.

Appropriate for all server-based environments, the BocaVision DTC203 is a true Windows®-based terminal running Windows CE.

The DTC203 supports Citrix® ICA® as well as Microsoft® RDP presentation protocols. The terminal supports international keyboards (U.K., and U.S. English, German, French and Spanish), works with 10/100BaseT Ethernet, and includes HostConnect terminal emulation software.

Easy configuration.

Thanks to features such as administrative tools and help screens in the setup program, network administrators find the upgradable BocaVision DTC203 extremely quick and easy to configure and reconfigure.

The DTC203 allows seamless implementation of Windows NT®-based transaction processing applications, multiple sessions and multiple protocol access to Windows and legacy applications, all based on the Windows CE operating system. Remote configuration of connections allows the DTC203 to handle account/user-based connection configurations. Firmware update allows the DTC203 to be updated over the network through FTP download of boot code, applications or the operating system.
